Public Health Emergency Preparedness Department
August 28, 2009

Greetings Providers:

The Texas Department of State Health Services has provided the opportunity for healthcare providers, if interested in administering “swine flu” vaccine, to pre-register and estimate the number of doses needed in preparation of it becoming available. The vaccine is currently in production by several manufacturers and it is anticipated to be available in mid October. The pre-registration process should be completed before September 11, 2009. Providers are expected to follow the CDC guidelines for priority groups as follows:

- Pregnant women
- Persons who live with or provide care for infants aged < 6 month (e.g. parents, siblings, and day care providers)
- Health-care and emergency medical services personnel
- Persons aged 6 months – 24 years
- Persons aged 25-64 years who have medical conditions that put them at higher risk for influenza-related complications

To register as a provider for the 2009 H1N1 Vaccine, please go to texasflu.org website and complete the pre-registration form. If you need additional information, please call 361-826-7251.
